Indian Lake

Investment opportunity on the Heritage Rideau Canal System!

Welcome to the Indian Lake Marina and Campground. This well-established business has 550' of deep, clean shoreline and is nestled in the trees with 26 acres of prime commercially zoned waterfront land. This gorgeous property not only has a full marina but offers a perfect getaway for the outdoorsy camper, fisherman and boater. There are three large dock sections with 80 slips available to rent. The main dock framework is constructed out of steel and the decking is pressure treated lumber. These docks have been updated recently and are in great shape with mainly seasonal boat slips rented. Down at the lakeside there is a convenience store with an LCBO location where boaters can find ice, water, clothing, camping/boating supplies as well as very popular scooped ice cream. There is a modern fuel system and a galvanized trailer septic pump out system attracting many Cruisers traveling the Rideau System.

WELL TEST RECORD

800 Larchwood Crescent, Kingston, ON
613 561 7867 ppwtsales@gmail.com
www.ppwt.ca

December 17th 2018

Regarding: Well Flow test and inspection for Indian Lake Marina and Campground

A well flow inspection was performed on December 12 th 2018. There is two wells on the property that was tested.

Well 1(currently in use) This is a drilled well construction with an approximate **depth of 108 feet and a static water level of 23 feet**. After pumping the well for 600 gallons and measuring the recovery rate, it is determined that the well is making a **minimum of 6gpm at this time**. Please note Well 1 was tested to be chlorinated at the time of inspection, which can affect any water quality testing results.

Well 2(currently not in use) This is a drilled well construction. A pump test was performed and this well was determined to be making a minimum of 12 gpm at this time.

General Chemistry tests were performed on each well and sampling was submitted to Caduceon Laboratories Ltd. The expected return time for results is 5 to 7 business days.

Remarks and recommendations:

Well 1:

1. I Recommend a submersible pump is installed in the well.
2. I recommend an Ultra Violet Light disinfection system is installed on all well water supplies.

If you have any questions in regards to these results and remarks, please do not hesitate to contact me directly.

Thank You

John Jeffery
Owner/Operator, Well Contractor #7275

SEPTIC INSPECTION 3/3

SEPTIC FIELD

Are there any signs of effluent breakout, foul odours, soggy grounds? YES NO

Are there any sign of tire tracks on the leaching beds? YES NO

Is there an effluent filter? YES NO N/A

Obstructions to the leaching bed (i.e. pavement over the bed, trees too close) None

Surface drainage is directed away from the leaching bed (i.e. downspouts)

Condition of bed area (looking for ponding water, biomat)

No ponding water or biomat

Inspect all mechanical equipment (i.e. pumps, aerators, alarms)

Comments And Suggestions

Flow test was completed on septic bed for approximately 30 minutes. Test holes were dug in septic bed area. There were no signs of biomat or water backing up. The septic bed drainage pipes had no signs of deflection from Hydro One truck driving over septic bed. Septic system is currently in good working order.
