Re: WETT Inspection report

Location of inspection: 1462 County Rd 8, Delta, ON K0E 1G0

5 June 2021

To whom it may concern,

This is to confirm that I have inspected the wood stove and venting installation at the above-described residential property (1462 County Rd 8, Delta, ON K0E 1G0). The scope, purpose and process of a Level 1 Inspection are defined in the accompanying document provided by WETT INC.

All clearances and specifications of the ULC S627 approved Enviro model Kodiak 1700 FS wood stove meet or exceed those required by the Manufacturer's listed installation instructions as per the certification label affixed to the rear of the appliance. The stove is connected to an approved Factory Built chimney Standard S 629 with listed double wall flue pipe requiring 6" clearance. See photos and inspection checklist connected to this report for details of appliance and venting. The entire report comprises 3 PDF documents and 8 photographs. All 11 elements are required to the complete report.

There are no deficiencies that can be ascertained using Level 1 inspection criteria.

Any questions concerning this installation may be directed to me using the contact information in the letterhead.

Michael Rousseau
WETT #390

This report is the result of a general visual inspection to determine compliance with C.S.A. B365-17. This Level 1 inspection is non-destructive and does not include inaccessible places or attics. Any recommendations are based on apparent and obvious conditions found as of this date. The report is intended only as a record of this inspection and no warranty of safety or function is implied since deterioration and use are beyond my control.
